

2013 FIFTH WHEELS & TRAVEL TRAILERS

OUTSTANDING CONSTRUCTION SETS US APART

- Wood frame construction is especially beneficial to full-timers because of its strength, durability, and comfort.
- Full 5/8" plywood floors are sturdy, quiet, and give your home a solid base.
- Heated basement area protects under-floor systems and stored items from weather extremes.
- Exclusive "Walk-Anywhere" one-piece seamless rubber roof (Winslow) and molded gel-coated fiberglass roof (Limited) are not only easy to maintain, but provide an exceptional barrier against the elements.
- Gel-coated fiberglass exterior gives your Excel a beautiful, easy-to-clean, durable outer skin that is virtually impervious to the elements.
- 2" x 4" tapered roof design provides outstanding run-off – shedding rain and snow more effectively and completely than flat roofs.
- R10 sidewall insulation and R17 floor and roof insulation help keep the coach cozy in winter and cool in summer, while also saving on heating and cooling costs.
- Standard pin height is adjustable from 41½" to 45½".
- Our exclusive "Drop Z" frame design provides a lower center of gravity for easy towing stability and more useful basement storage. We use a box tube frame for unbeatable strength and durability.

The top bunk moves down when you need it, and up when you don't. Cabinet space above the garage door in the living area is also great for storing gear.

Three available floorplans include commercial grade rubberized flooring, and options like a built-in generator and 30-gallon fuel cell for worry-free camping in remote areas. And every Wild Cargo is covered by our exclusive Minus Ten Degree Guarantee, providing peace of mind that your tanks, water lines, and other essential plumbing fixtures won't freeze when the temperature drops.* An optional full-body paint package matches your adventurous spirit.
