

Infinity

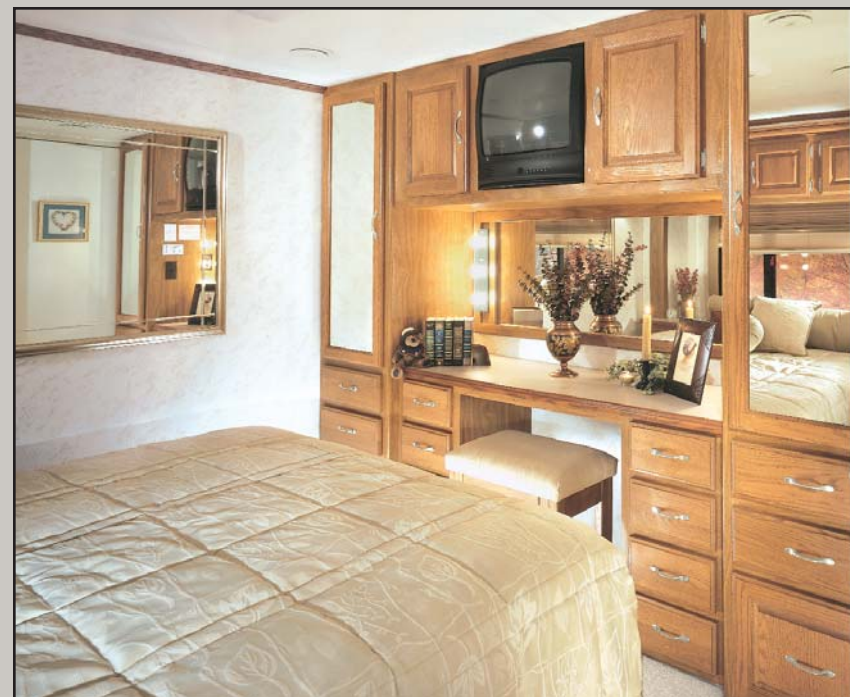

Class A Motorhomes

Infinity... where the highest in standards matches the highest in value. In the Infinity Class A Motorhome, the freedom is yours to travel the country in comfort. With standard features that include gel-coat exterior sidewalls, hydraulic leveling jacks, dash fans and satellite prep, the Infinity has it all at a price you can afford. The Infinity continues our history of superior value in grand fashion.

Whether it's the living room, kitchen or front cockpit area, you'll find the Infinity is carefully designed with the owner in mind. Each living room has a beautiful sofa with built-in overhead cabinets and Day/Night shades. The kitchen features an abundant amount of storage with Corian® countertops and sink covers. Infinity's cockpit area has a 25" overhead color TV with storage cabinets and an ergonomically designed dash with all switches and controls within easy reach for the driver. Also, the cockpit features a fully insulated, double-plated steel floor and firewall for your protection.

Infinity has several different slideout floorplans to choose from. The line-up includes both single slideout and double slideout models. Each floorplan dramatically increases your living areas without sacrificing interior or exterior storage. All Infinity kitchen slide rooms come equipped with our patented travel lock system which secures the room safely.

Infinity's innovative in-floor slide system on slide rooms allows for full height exterior storage compartments. The 3" floor provides more room for the mechanism so there's no space taken up inside or outside the motor home.

Re-designed sub-floors have allowed for more exterior storage than ever. Infinity now has 2¹/₄ pass-through compartments on all floorplans (n/a 34W) and the open face design highlights the storage system. The RotoCast® construction reduces the possibility of water intrusion and allows for quiet and strong compartments.

Infinity's heated, lighted utility station makes set-up and take down a snap day or night. Enclosed within a dedicated RotoCast® compartment, phone, cable, electrical and plumbing connections remain protected and dry. An outside shower provides easy clean-up, while a separate sewer hose compartment keeps things neat and tidy. Large holding tank capacities ensure longer usage between dumping.

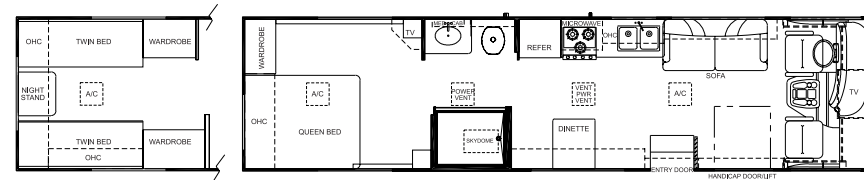

34W "Easy Access" Class A Motorhome

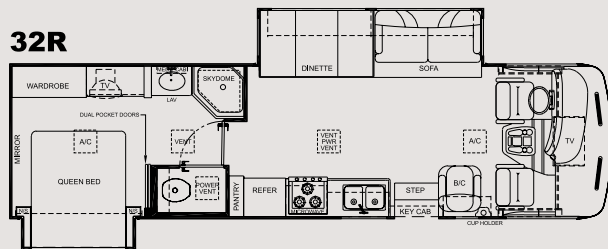

The Infinity 34W "Easy Access" floorplan is specifically designed to enhance the traveling and camping opportunities for everyone. It comes equipped with a Braun Corporation hydraulic lift and includes standard features such as a free-standing dinette, convection microwave, oversized roll-in shower and an open sink area in the bathroom. This floorplan also features extra wide aisles for maximum accessibility. It includes all the great construction and safety features found in every Infinity.

Why a Thor Product Is Your Best RV Value.

Thor Industries, Inc., listed on the New York Stock Exchange (THO), proudly traces its history back over seventy years to the pioneering days of the RV industry with the founding of Airstream, the industry's oldest and most renowned brand. Our total commitment to quality and our philosophy of putting our customers first has led to our continuous growth. Today Thor is the largest builder of RVs. Thor's strong financial condition and years of solid growth are your assurance that we will be here to serve you for years to come. We think this extra peace of mind is important when you are making a significant investment. Because our customers are always #1 with us, we work harder than other manufacturers to satisfy you.

WARRANTY**The Industry's Best Warranty – By Far!**

We're so confident in the design and construction of our products that they are covered by Thor's exclusive Full 2-Year Limited Warranty* "bumper-to-bumper" coverage to protect your RV investment. The best protection in the RV industry – by far!

*For complete information see the warranty provided with your vehicle.

This brochure is printed on recycled paper as part of Thor's corporate effort to minimize waste and conserve our natural resources. Providing safe, fuel-efficient recreational vehicles is Thor's way of further demonstrating our role as the industry leader in safeguarding our nation's environment.

Product information, specifications, and photography in this brochure were as accurate as possible at time of printing. Photographs may contain some features that are optional on your vehicle. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

Vehicle Loading:

Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry Weights:

Based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight. (GVWR) and includes fluids, options, and cargo. Liquid capacities and weights are approximations only.

Warning:

This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing, and towing instructions.

IMPORTANT: The towing vehicle's braking system is rated for operation at GVWR (Gross Vehicle Weight Rating), NOT at GCWR (Gross Combined Weight Rating). A separate functioning brake system is required for any towed vehicles or trailers weighing more than 1000 lbs. (450 KG) when fully loaded.
